M. I. T. A. A. ELECTS OFFICERS FOR YEAR

**C. Fernstrom, J. A. Avery and
T. B. Parker on Advisory
Council**

The regular meeting of the M. I. T. Athletic Association was held at the Union at 4 P. M. yesterday. The treasurer's report showed a balance on hand of \$19.71.

The following officers were elected for the coming year: President, R. H. Allen 1910; Vice-president, H. Lockett, 1910; Secretary, W. D. Allen 1910; Treasurer, C. H. S. Merrill 1910. Formerly the offices of Secretary and Treasurer have been combined into a single office, but this year it has been deemed advisable for the efficiency of the association to have them as two distinct departments.

The advisory council, which consists of two seniors and one junior was elected as follows: C. Fernstrom 1910; J. Avery 1910, and T. B. Parker 1911. This council has entire charge of the finances of the athletic teams of the institute.

The meet next Saturday is practically the last outdoor work for any of the track men. As it is impossible this year for any amount of indoor work for the track team, it is hoped that every man will be out at the field Saturday. More men must be had for this work as in all other departments of Institute athletics.

FRANCIS HAS SHOWS

**Lyric Competition To Be
Called Soon**

Now that the books for Tech Show 1910 have been turned over to coach Francis to pass judgment on, the Show may be said to have gotten thoroughly under way. The department managers have completed their schedules of work for the year, and yesterday the call for assistants in the Business Department was issued, and a few men have responded already.

At the Show Kommers dinner to be held in the Union on November 20 the name of the winning author will be read out, and on the following day the Lyric competition will be called by Stage Manager Greenleaf. This competition is open to all, and every man that has any aptitude for writing verse should enter. All lyrics are written by Institute men, and for this reason it is up to the undergraduates to make this phase of the Show a success.

Business manager Wilson urges all men who contemplate entering the Business Department competition to see him early in order to be on the same footing with the men already out.

TECHNIQUE

Elections to Technique staff:
Assistant Business Manager—Cedric S. Anderson of West Roxbury.

Art Staff—John A. Bigelow of Marlboro, Robert O. Wood of Concord, Milton E. Hayman of Taunton, John R. Bell of Malden, William D. Foster of Springfield.

A special meeting is called for tonight (Thursday) to elect an editor-in-chief.

SENIOR DINNER COMMITTEE SELECTED

**Class Finances Discussed And
Dues For Term
Fixed**

In a short, snappy meeting, the class of 1910 cleared away its routine business yesterday in five minutes, in a way which spoke well for the ability of the new president, Richard F. Goodwin, Jr., who presided for the first time. It was a marked contrast to the lengthy sessions which have been the general order of things. Secretary Fitzwater read the minutes of the last meeting, including a summary of the treasurer's report and was followed by the new treasurer, H. S. Cleverdon who reported that \$28 had been collected on the hall-lots of which about half had been turned over to him. President Goodwin gave an estimate of expenses for the coming year which he said would amount to about \$50, which with a debt from last year, would make \$60 to be raised. It was then voted to levy an assessment of fifty cents and treasurer Cleverdon appointed many of the collectors in the different courses.

The matter of the class dinner was brought up, and attention was called to the fact that it would be necessary to have it about the first of December in order not to conflict with either Thanksgiving or Christmas week. It was voted that a committee of three be appointed by the chair to arrange for the details, and the meeting was adjourned. The committee appointed by President Goodwin is: Philip Terry, Chairman, Gorton James, and Dudley Clapp.

WALKER CLUB

**Smoker Given To College
Graduates At Tech**

The Walker Club held its annual smoker at the Technology Club on Tuesday evening. About fifty college graduates were present.

R. H. Allen welcomed the new men in the name of the Walker Club, and introduced Dean Burton.

The Dean welcomed the new men in behalf of the faculty and spoke of the attitude of the Walker Club in giving the smokers. He also spoke of the Technology Club and said that it was interested in the new men because they were eligible for membership.

Mr. Underwood, president of the Technology Club, gave an illustrated smoke talk on hunting big game with a camera in New Brunswick. He used slides taken and colored by himself. The meeting unanimously passed a motion thanking Mr. Underwood, after which the meeting adjourned to the dining room.

Prof. Winslow of the biological dept. is attending the convention of the American Academy of Medicine. The general subject of discussion will be "Infant Mortality" and will include its rapid increase and the neglect causing it. It will be held in New Haven to-day and tomorrow.

TECHNOLOGY REVIEW PUT ON SALE TODAY

**Work Of Alumni Associations
And News Of Recent
Graduates**

Appearing today, the new number of the Technology Review presents to graduates and undergraduates alike, many topics of interest.

The work of the alumni associations is opened by an article on the recent New York clubhouse. The announcement is made of nominees for term members of the corporation and for officers of the Alumni Association. Many graduates and the presidents, both Dr. Noyes and Dr. MacLaurin have received degrees. The committee on the investigation of aeronautics and the resignation of Professor Mott are also mentioned. After outline of the attractive programmes for the winter by the alumni organizations, came biographies of Tech men in the public eye.

The Alumni Council and its proceedings contain much of interest, for it indicates in many ways the interest of the graduates for Technology and in undergraduate affairs. A list of elected associate members of the association and miscellaneous clippings about the Institute and Tech men precede what is perhaps the most interesting part of the publication, the news from the classes.

Of all these the undergraduate is most interested in the plans for the great campaign for a new Technology, the news of the departments and the news of the recent classes, for in them, are many notes of those still well-known by the upper classmen.

One very complete record is given of the present occupations of 1909, whose members are now scattered widely from California to Maine, with a few over the boundaries into Canada and Mexico.

After an unsuccessful attempt to obtain a joint club house with other colleges, the Technology Club of New York, by its progressive spirit, raised a fund and bought a good four-story building in Gromeray Park, which was formerly the headquarters of the Independence League Club. After extensive alterations, a very attractive club house has been reached. The increase in membership due to the increased accommodations has been tremendous, 85 per cent. in four months.

The informal counts of the registration prior to November's official count, have brought out these facts: a larger total, a larger number coming from other colleges, of which Yale is now in the lead and 32 foreign countries are represented, besides 42 states, two territories, the District of Columbia, Philippine Islands, Porto Rico and the Canal Zone. Twenty-one graduates now have sons at the Institute.

ON ADVISORY BOARD

**Sedgwick Reappointed To U. S.
Hygienic Laboratory**

Prof. Sedgwick has been notified of his re-appointment by the Secretary of the Treasury for a term of five years as a member of the Advisory Board to the Hygienic Laboratory, United States Public Health and Marine Hospital Service.

Last evening he gave a public address in Rochester N. Y. before the Ninth Annual Conference of the Sanitary officers of the state of New York. His subject was "Shall we continue, or shall we stop the sewage pollution of streams?"

NEW REGULATOR FOR DYNAMOS IN LOWELL

**Bus Bars Connected For New
500 Kilowatt Machine
In Pierce**

Last Sunday the electrical plant was closed for improvements. The bus bars to the new turbine and the new regulator were connected.

The new Tinnell Voltage Regulator has just been put in service. This apparatus will control the voltage of the Russell, and Westinghouse engines.

The voltage is regulated indirectly by rapidly opening and closing a short circuit across the exciter field rheostat, thus varying the exciter voltage in order to maintain the desired outgoing voltage. A control magnet is connected across the exciter mains and is provided with a fixed stop core in the bottom and a marble core in the top, attached to a pivoted lever at the opposite end of which is mounted a flexible contact. A differently wound relay magnet is also connected to the exciter mains, one winding being permanently connected to the mains, while the other is arranged to be opened and closed by the floating main contacts.

A relay has a pivoted armature to which there is a spring attached to oppose the pull of the magnet. This relay short-circuits the exciter field rheostat, the condensers behind the board serving to prevent destructive arcing.

A drop in voltage weakens the relay magnets, and the closing of the short circuit contacts across the exciter field rheostat, causes a rapid increase of exciter voltage which in turn builds up the voltage of the mains. Conditions are thus restored to a normal state and the relay releases the short-circuit contacts.

TECHNOLOGY EXHIBIT

**Inscription By President Ex-
plains Institute Ideal**

"To train men liberally to be leaders in engineering, architecture, and science, and to give them the will and the power to save the state by scientific method and with scientific spirit."

In these words of President MacLaurin, the purposes of the Institute are outlined, at the Boston 1915 Exposition. Technology has a very attractive and well arranged exhibit, with large pictures of buildings and laboratories, and many table exhibits illustrative of the work of various departments. Last night the laboratories of the Institute were again open to those attending the Exposition.

FIELD DAY PICTURES

The proofs of the field day pictures, which were reported to be in 37 Rogers, are now at Litchfield's, 823 Washington St. Several of these photographs may be found at the cage.

An unusually good set of pictures have been secured this year.

BOSTON, MASS., NOV. 11, 1909.

The Tech takes great pleasure in announcing the appointment of R. T. Bailey 1913, and Christopher Fallon 1913, to the business staff and that of William Guild to the circulation staff.

Although patronage at the Union is increasing, the attendance is not as large as it should be. At present a great effort is being made to please the patrons in spite of the unfortunate occurrence of last Friday; there is more variety in the menu, and in a few cases prices have been lowered. It seems that with the improvements, the Union is certainly worthy of the patronage of everybody at the Institute and the way to make it even better in quality and price is to increase the patronage still more.

Season tickets have been mentioned before in these columns, but as they are not selling any better now than at the first of the year, an investigation has been made for the reason.

There is a reason for everything. Here is the reason that season tickets are not selling.

The management of the various sports claim that they are always around trying to sell the tickets but—they can never be found when prospective purchasers seek them.

When class pipes, Technique tickets, and theatre tickets are on sale there is always a table in the Union where they can be found and there is always someone who with great effort, tries to induce purchases, but with season tickets, the buyer must first find the seller and not, as in other cases, the seller the buyer.

Some scheme could be arranged by the managers of the different sports so that representatives of that sport may be found in every course at the Institute, who will have charge of the tickets.

Non-support of athletics will soon be the cry by all the managers, but when the reason is traced, it will be found that those at fault are the same ones who are doing the crying.

But it is not yet too late.

Let every manager and assistant manager and even sub-assistant manager, start NOW and sell those tickets in proportion to the amount of energy which they put into the sale.

CORRECTION

The Tech regrets that the signature of W. Fred Dolke was misspelled in yesterday's issue.

COMMUNICATION.

Nineteen thirteen won field day, and a glorious field day it was, but are the freshmen going to rest on their laurels and let 1912 clean up everything else? Next spring there will be the annual freshman-sophomore cross country race and from the present indications it will be an absolute walk over for the fast 1912 team. Preparation for this race cannot be made entirely in the spring. Work must also be done during the fall, and at present there are almost no 1913 men out for cross country work. Wake up freshmen! There are plenty of distance runners in your class; all you need is to come out and find who they are. The walk over the handicap course Sunday P. M. is an excellent time for new men to become acquainted with the cross country work, and with the men who are now running. Come out 1913 and show your true worth.

C. R. ELDRID,
Chase Capt.

HARE AND HOUNDS

There will be no hare and hounds run next Saturday. Instead all men will report at the field for the inter class meet.

On Sunday afternoon, Nov. 14, there will be a walk over the Handicap Course at West Roxbury, when Mr. F. H. Hunter 1901 will accompany the men and acquaint them with the ground over which the race will be held. This will be the last chance for the men to become acquainted with the course before the race which will be held on Nov. 27.

The train leaves Back Bay at 2.10.

HORNET'S NEST

Dick was sore when he came into the room. That was evident, and I waited for the outburst which I knew was coming. Sure enough, scaling his hat onto the bureau and incidentally knocking down half the articles on it, he slammed his notebook down on the bed and remarked:

"If there's one thing in the world worse than a smart student it's a smart prof."

"Who's been sitting on you now?"

"Old Sorehead in geography."

"Did you pick him up? How did you happen to know more than the prof?"

Just then Quincy butted in with his usual mountainous accumulation of notes.

"Hello Diogenes! Come on in, the water's fine. Dick here is roasting the faculty."

"The profs here know all there is to know about one little subject, but—"

"The principle of division of labor. Each individual learns thoroughly one part and does that work more skillfully than any man could do all the work."

"That's just the point," said Dick, getting excited and consequently oratorical.

"It works all right in manufacturing, but it doesn't work in teaching. A prof thinks because he knows all the fine points of his one little line of work that he needn't know anything about kindred subjects, and some of them don't seem to use common sense. Think of the professor telling a class of juniors that they'd get a different answer if they used five instead of four place logs! Why, get a prof out of his department and he doesn't know as much as the average soph, let alone seniors and sharks like Diogenes here."

(Continued on page 3.)

(Continued from page 2.)

"Why I don't know so much. I merely learn the lessons as we go along with such corollary reading as I have time to do. However, I rarely interfere with a professor unless I cannot understand his line of reasoning, and in that case I see him after class and talk it over with him."

"I don't make a practice of picking up instructors when they make slips, but when a man makes an absolutely incorrect statement that can be proved incorrect—"

"Your dissertations are dramatic in the extreme, Dick?" said I, interrupting his flow of eloquence, "but they're not very filling. Me for some grub." And even Diogenes showed enough interest in this suggestion to depart from his books for a brief period.

INSTITUTE COMMITTEE

Institute Committee Chosen

At a meeting of the Institute Committee yesterday, D. Clapp, 1910, reported on the present system of mail and parcel delivery. Telegrams and mail are under the charge of the Registration office. Bundles, however, will be delivered at the cage only when letters are left with them. Absolutely no exceptions will be made to this ruling.

A new decision was made in regard to the point system. All members of the Institute Committee are eligible to the Executive Committee regardless of the number of points they carry and that all persons are allowed to participate in athletics. Men in classes A and B cannot be a team captain.

A system of coaching for Field Day by the upper classmen will probably be used next year, doing away with the expense of a professional coach. This matter is under serious consideration at present and it is certain to produce some results.

CURRENT EVENTS

An action begun by the Seneca Indians to prove title to the Alleghany and Cattaraugus Indian Reservation has been dismissed by the Court of Appeals. The decision is based upon the ground that the Indians have no right to sue except upon special authority. The land in question comprises fifty thousand acres and is occupied by six hundred Indian families and the village of Salamanca.

A great step forward in the national fight against tuberculosis was taken when a unique institution, a Tuberculosis Preventorium for children was formally organized in New York. Its purpose is to rescue from the tenements children who have been infected with the disease and restore them to health while there is yet time.

EXCHANGES

A system of student government with a cadet at the head as president has been started at the Virginia Polytechnic Institute.

Dr. David Starr Jordan, president of Leland Stanford University, has recently published "The Religion of a Sensible American."

Interest in wrestling at the University of Chicago is very great and there is talk of forming an intercollegiate league in the West.

Wisconsin is said to have 175 candidates for freshmen crew, who will be kept hard at work all winter. Until Thanksgiving they will spend two afternoons a week on the track, after which they will be put on the machines.

\$1.00 to \$3.50 each.

The annual dual shoot between the freshmen of Yale and Harvard will be held on Soldiers' Field, on the morning of the Yale-Harvard game, Nov. 20.

President Henry C. King of Oberlin has left for a year's tour through India, China, and Japan. He expects to deliver several addresses in the larger cities and at the principal colleges.

It seems strange that college boys will not learn that they must not go to a musical show and throw confetti and other things upon the stage. The minute they get inside the auditorium they seem to want to decorate the stage, never taking into consideration the fact that every speck of tissue paper may cause one of the dancing girls to slip and get an ugly fall.

"The confetti habit came up at the Colonial the other night, when the Tech boys filled the house to see 'The Fair Co-ed' after their days' sport on the oval, but when the situation was explained to them in behalf of Elsie Janis, the star, they were the pink of perfection the rest of the evening."—Boston Evening Record.

NOTICE.

There will be a 1913 class meeting at one o'clock Thursday, Nov. 11, in Huntington Hall.

All freshmen who have not signed the Constitution of the class should do so at once at the Cage.
